Unlock new possibilities in cow and herd management

Nedap Now is the cloud-based platform for Nedap solutions. Combining the accuracy and reliability of Nedap's cow monitoring platform with the processing power and scalability of cloud computing, it unlocks new possibilities in cow and herd management.

> **"The system watches the cows – and based on their activity – lets us know which ones are cycling and automatically drafts those cows out."**
>
> Chad & Jan Winke

Benefits at a glance

- Access data 24/7/365 from anywhere

- Attain seamless integration with herd management systems and third-party stakeholders

- Access more historical data over longer periods of time

- Create customised work lists with relevant insights for each team member

- Allow selective access to data for team members or third-party consultants

- Combine data in one spot for improved analysis and insights

- Quickly identify anestrus cows or potential pregnancy losses.
